

You just got a job for Best Buy corporate! See, your Computer Engineering certificate paid off already!

Go to [www.tigerdirect.ca](http://www.tigerdirect.ca), or another source (Canadian) that identifies the cost of each component to configure a personal computer.

Your objective is to configure the best possible Intel i5Core computer for your personal use for under \$2,000 (without tax).

Select your choice of following components:

- Case
- Motherboard (mainboard)
- Processor
- Memory
- Hard Drive
- Video Card
- DVD Drive (BluRay)
- Audio Card
- Network Card (wireless Ethernet)
- Operating System
- Office Software
- Keyboard
- Mouse
- Speakers
- Webcam
- Monitor
- Printer (Print/ Copy/ Scan)
- Other???

Click on "Add to Cart" and then print your shopping cart.

If you use another source, create a spreadsheet listing all of the components, their prices, and the total cost.

Use the 'FutureShop' ad template you evaluated the other day as the base for creating a specification for your designed system. Create an enticing overview to appeal to a wealthy high school student.
